Status of Congestion  
Mitigation and Air  
Quality Improvement  
Program

September 2017

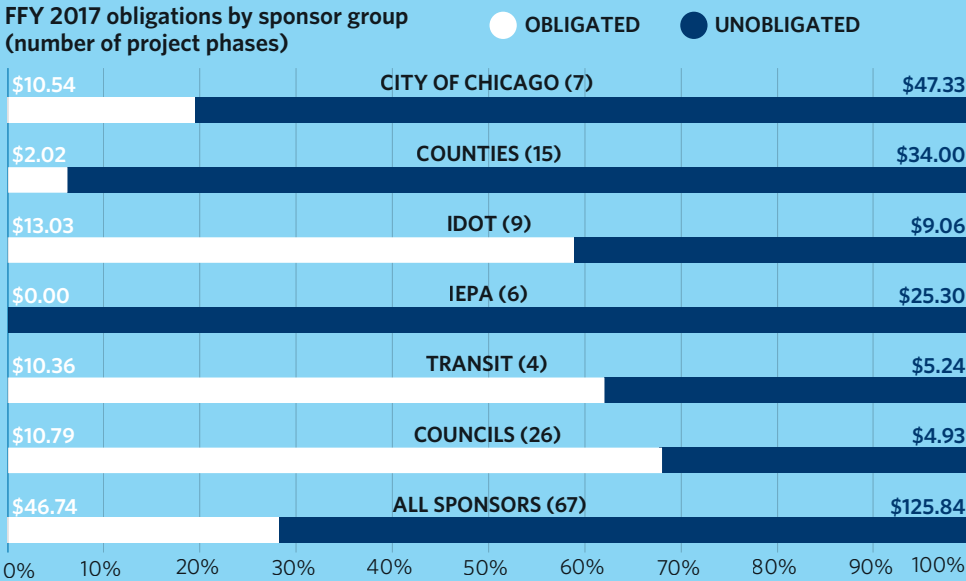

The Chicago Metropolitan Agency for Planning (CMAP) administers the Congestion Mitigation and Air Quality Improvement (CMAQ) Program, a federally funded program of surface transportation improvements designed to improve air quality and mitigate congestion. CMAP prioritizes proposed projects based on their support for the goals and action areas of GO TO 2040. The CMAP Board and MPO Policy Committee established programming and management policies in order to complete CMAQ projects promptly. These policies include accomplishment benchmarks, sunset provisions, and obligation goals established by the CMAQ Project Selection Committee.

► If a project phase is not accomplished by its sunset year — the year it was originally programmed plus two years — all remaining funding that is not federally obligated will be removed from the active CMAQ program and the project will be considered “deferred.” Pending the availability of CMAQ funds, a deferred project phase can be reinstated if the sponsor demonstrates that it is back on track.

FFY 2017 obligations, in millions of dollars

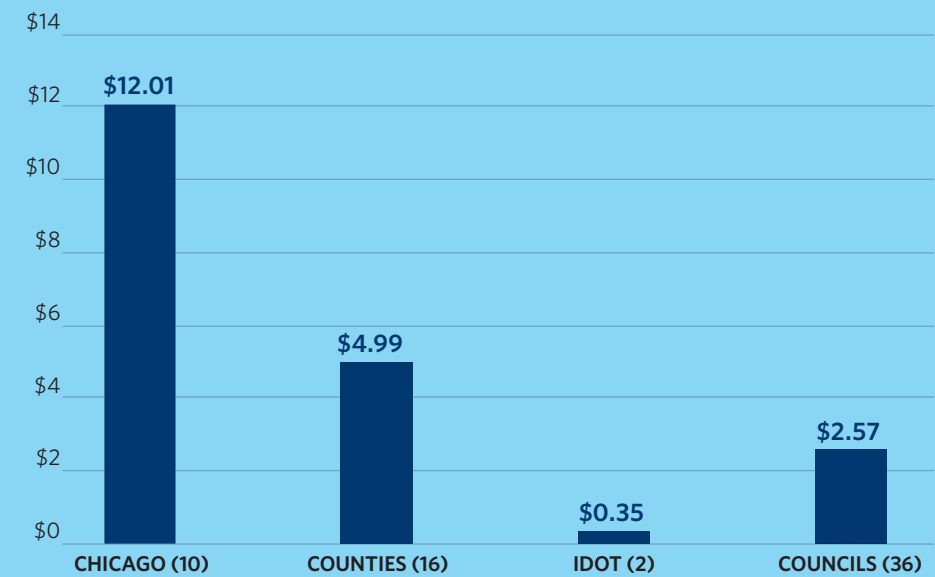

FFY 2017 obligations by sponsor group (number of project phases)

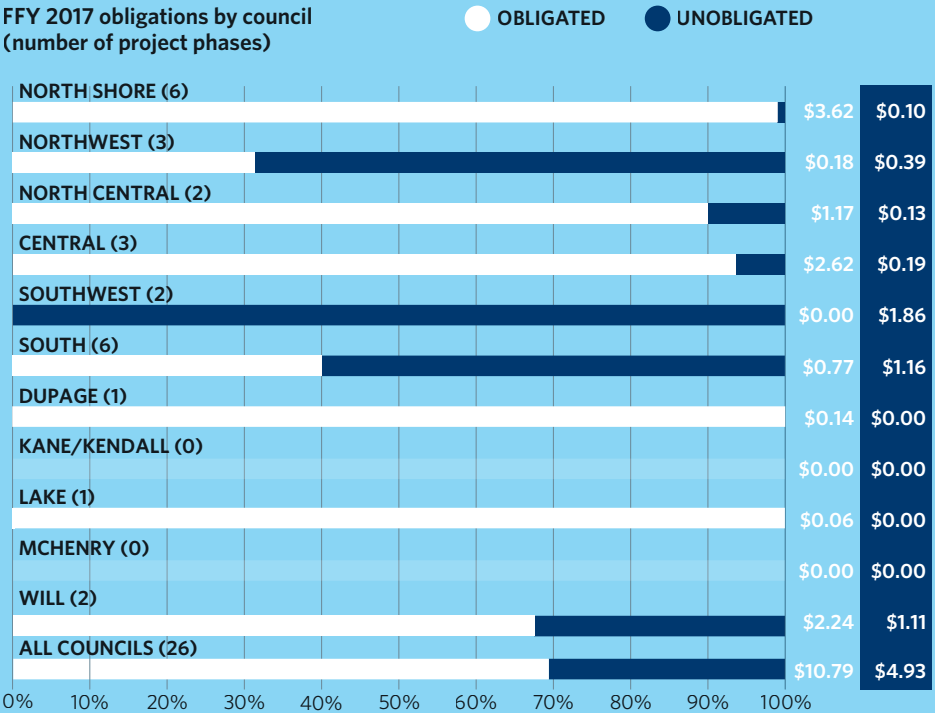

Program (including increases and withdrawals) as of August 24, 2017. Obligations through August 17, 2017 in millions of dollars. IDOT - Illinois Department of Transportation. IEPA - Illinois Environmental Protection Agency. Source: Chicago Metropolitan Agency for Planning.
